Project Title: Croissant Website

I'd like to build this site as multiple pages, rather than a long, single page website. Typical site navigation probably across the top. I think there is plenty of content and photography to build out individual pages. Please include text and visual imagery on each of the following pages for example images of each ingredient maybe.

- **Home Page/Introduction** – Introduce croissants as something delicious and inviting. Include a description of what a croissant is.

- **How to make**

- **Origin and history**

- **Overview of manufacturing**

- **Ingredient functionality** – make subtabs for each?

- **Variants**
